

## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. ## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

You can visit the following websites for more information about COVID-19:

- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. ## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

You can visit the following websites for more information about COVID-19:

- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever. Anyone arriving at one of our settings who is

exhibiting these symptoms is subject to being asked to return home, or in the case of home settings staff may cancel the shift when practicable.

Our intent is to continue providing services as long as it is practicable, safe and have available staff and critical supplies to do so.

Dan Fazzini,  
Executive Director

## ACS Corona Virus Preparedness Plan – March 13<sup>th</sup>, 2020

Dear ACS parents, families, and partnering providers,

We have been keeping a close eye on the situation surrounding COVID-19. While the number of cases in the United States continues to climb, state health officials indicate the risk of contracting the disease in Utah currently remains low.

As many of you know, Governor Gary Herbert has issued an emergency declaration for Utah. He said issuing this order now allows our state and communities to access additional funding and resources that can be instrumental in slowing the spread of the virus.

At ACS, our emphasis is on keeping our participants and day services hubs healthy and planning for any potential increases of COVID-19 cases in the future. Our staff have increased frequency of disinfecting common touchpoints, such as door handles, sinks, tables, counters, and restrooms. We are also proactively working with participants on proper hand washing and using hand sanitizer throughout the day.

We are temporarily adjusting some of their activities and programming to minimize the impact to our participants, staff and the community. This includes:

- Evaluating and limiting community-based recreation
- Adjusting program-based activities
- Suspending the face-to-face portion of work assessments and job development
- Continually reviewing treatment programs and adjusting based on available staffing and critical supplies

As a support agency that cares for many immune compromised individuals, we ask you to keep doing your part to slow the spread of COVID-19.

- Stay home if you are sick and keep your participants home if they are sick.
- Wash your hands often with soap and warm water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched objects and surfaces using a household cleaning spray or wipe.

**All staff, participants visitors to any of our programs and people receiving home-based services in homes are subject to additional screening if they are exhibiting symptoms** of the COVID-19 virus which include: dry coughing, compromised respiration/difficulty breathing and fever.
